Dear Hiring Manager,

I am writing to express my interest in software engineering and mobile development opportunities within your organization. I am a Senior / Lead Flutter Engineer with 7+ years of software development experience, building and delivering production applications across Android, iOS, and Web.

My core expertise includes Flutter, Dart, mobile architecture, REST APIs, Firebase, WebSockets, state management, native and platform integrations, third-party SDKs, performance optimization, production debugging, testing, and application releases. I have worked across e-commerce, POS, HRMS, hospitality, food-tech, consumer applications, trading, and IoT, taking ownership from requirements and implementation through deployment and post-release support.

I also bring technical leadership experience, including working with cross-functional teams across product, backend, design, and QA. I focus on writing maintainable and scalable code, applying practical architecture and engineering principles, and solving production problems with a strong sense of ownership.

Over the last 2+ years, I have also incorporated AI-assisted development into my workflow using tools such as Claude and Cursor for code analysis, debugging, refactoring, implementation support, and productivity. In parallel, I am expanding my knowledge of Python and Generative AI, including LLMs, RAG, Ollama, and Hugging Face, with an interest in building AI-enabled applications.

I am open to Senior Flutter Engineer, Lead Flutter Developer, Mobile Tech Lead, and related software engineering opportunities where I can contribute my production mobile experience, technical ownership, and continuous-learning mindset. I would welcome the opportunity to discuss how my background could contribute to your team and products.

Thank you for your time and consideration.

Best regards,

Siddardha Devarayapalli
