

SIDDARDHA DEVARAYAPALLI

Senior / Lead Flutter Engineer | Mobile Architect | AI-Enabled Application Developer

📞 9985091823 ✉ Siddardhadevarayapalli@gmail.com [🌐 LinkedIn](#) [📁 Portfolio](#)

PROFESSIONAL SUMMARY

Senior Flutter Engineer and Lead Developer with **7+ years of software development experience** building, scaling, debugging, and releasing production applications across **Android, iOS, and Web**. Strong expertise in Flutter application architecture, state management, REST API integration, native platform integration, Firebase, cloud services, third-party SDKs, and end-to-end mobile release management.

Experienced in working on **consumer-facing, enterprise, POS, e-commerce, HRMS, IoT, hospitality, trading, and food-delivery applications**, including products used by international brands and clients.

Hands-on experience with **Flutter, Dart, Java, Kotlin, Python, Node.js, REST APIs, WebSockets, Firebase, AWS, GCP, MongoDB, MySQL, and SQLite**. Proven ability to troubleshoot complex production issues, optimize application performance, integrate native/third-party technologies, and take ownership of features from development through production release.

Over the last **2+ years, actively using AI-assisted development tools including Claude and Cursor** for software development, debugging, code analysis, refactoring, documentation, and development productivity. Currently expanding into **AI Engineering with Python**, with hands-on learning and experimentation involving **Generative AI, Large Language Models (LLMs), Ollama, Retrieval-Augmented Generation (RAG), Hugging Face models, prompt engineering, and AI-powered application prototypes**.

Strong interest in combining **Flutter + AI** to build intelligent mobile and cross-platform applications.

Education

PBR Visvodaya Institute of Technology & Sciences
Bachelor in Electronics & Communication Engineering

June 2014- April 2018

CORE TECHNICAL SKILLS

Languages: Dart, Java, Kotlin, Python, JavaScript

Mobile & Cross-Platform Development: Flutter, Android, iOS, Flutter Web, Platform Channels, Native Android Integration, Unity Integration

Architecture & State Management: Clean Architecture, MVC, MVVM, GetX, BLoC, Provider, Riverpod, Modular Application Architecture

Backend & APIs: REST APIs, Node.js, Flask, WebSockets, API Integration, JSON

Databases: MySQL, MongoDB, SQLite, Firestore

Cloud & Backend Services: Firebase Authentication, Firestore, Cloud Functions, Crashlytics, Google Cloud Platform (GCP), AWS EC2

AI / Generative AI: Python for AI, Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), Ollama, Hugging Face, AI Application Prototyping, AI-Assisted Software Development

AI Development Tools: Claude, Cursor, AI-assisted coding, AI-powered debugging, code generation, refactoring and technical analysis

Monitoring & Analytics: Firebase Crashlytics, Sentry, Amplitude

DevOps & Release Management: Git, GitHub, Google Play Console, App Store Connect, TestFlight, Android/iOS Production Releases, CodeMagic

PROFESSIONAL EXPERIENCE

Novizco Infotech

Present Role: Lead Flutter Developer

Sept 2025 - Present

Collector's Card – Project Overview :

- Developed and maintained the Flutter mobile application for both Android and iOS, handling UI, architecture, API integration, and state management.
- Worked on Unity integration within Flutter, enabling communication between Flutter and Unity modules.
- Managed app builds and releases through TestFlight and Google Play.
- Integrated services such as Firebase, Sentry, Amplitude, and Unity for authentication, analytics, crash monitoring, and application functionality.
- Used AI-assisted development tools such as **Claude** for code analysis, debugging, refactoring, implementation assistance, and development productivity.

iOS : <https://apps.apple.com/us/app/collectors-card/id6754694464>

Shervani Tech Hub Pvt Ltd (Payroll) | Client: WWT (USA) – Krispy Kreme

Present Role: Flutter Developer

March 2025 - Sept 2025

- **Krispy Kreme Mobile Application (USA-based doughnut brand):**
- Implemented the **Auto-Apply Coupons** feature to improve the checkout experience.
- Developed and enhanced **Offers & Promotions** features across Android and iOS.
- Fixed critical production issues and improved application performance and stability.
- Collaborated with cross-functional teams to deliver features and production releases.

iOS : <https://apps.apple.com/us/app/krispy-kreme/id482752836?platform=iphone>

IdeyaLabs

Present Role: Associate Tech Lead

Nov 2024 - March 2025

- **ChargeSavvy:** This project is a comprehensive POS (Point of Sale) application tailored for restaurants and clubs, featuring advanced inventory and order management capabilities. It enables staff to create, modify, and merge tabs, transfer orders, manage cart items, apply discounts, handle script fees, and process payments with various options like PayLater and PreAuth. The app syncs data in real-time with a backend server via APIs ensuring seamless operations. It incorporates a user-friendly dashboard, supports multiple user roles, and adheres to strict error handling and security standards. Built with robust business logic, it enhances operational efficiency and simplifies complex workflows in hospitality environments.

PhotonX tech PVT LTD

Present Role: Sr.Flutter Developer

Jan 2023- Aug 30 2024

- **Stellar HR:** Created a comprehensive self-service app that enables employees to manage their profiles, access company resources, and track their own performance metrics.

- **EmpireAI:** Built a robust trading application with advanced analytics and real-time market data to assist users in making informed trading decisions.
- **Vibho HCM App :** Created a human capital management tool for efficient employee data management, payroll processing, and performance tracking (version 3.19, Bloc state management).
App Link : https://play.google.com/store/apps/details?id=com.vibho.hcm&hl=en_IN
- **Sunray Resort Mapping: Full-Stack Development (Flutter & Node.js):** Developed a resort mapping application with an interactive map that provides guests with information about resort amenities, dining options, and activities. The frontend was built using Flutter (version 3.19, GETX state management, MVC Architecture), delivering a smooth and intuitive user experience, while the backend was built using Node.js and MongoDB, deployed on AWS EC2.
- **Moms Food: Full-Stack Food Ordering Platform (Flutter & Node.js):** Created a food-selling and buying platform with a user-friendly interface for order management and transactions, using Flutter (version 3.19, GETX state management, MVC Architecture) for the frontend. The backend was developed using Node.js, with PHPMyAdmin handling the database, ensuring seamless transactions and data management.

MomsFood : https://play.google.com/store/apps/details?id=com.mooms.foood&hl=en_IN

MomsFood Seller : https://play.google.com/store/apps/details?id=com.momfood.sellers&hl=en_IN

- **QuickNews: Full-Stack News Application (Flutter & Node.js):** Designed a news app using Flutter and Node.js and MongoDB on AWS EC2 that delivers quick updates, combining ads, quotes, and multimedia content. The app prioritizes fast and easy access to news, keeping users informed efficiently and within a short time frame. The application prioritizes speed and simplicity, ensuring timely news delivery.

Infyodha Solutions PVT LTD

Role: Flutter Developer

June 2021 - Dec 2022

- **Briscart Shopping App :** Briscart is an All In One shopping Store. Browse all the shopping android & IOS in our single App. One main feature is our Search. It searches the products from all the stores and displays them in a single screen. Get Cash Bonus and Referral Bonus also get ones you purchase any product from Jollykart365 and by referring a friend.
- **Briscart Shopping WebApp :** Briscart is an All In One shopping Store. Browse all the shopping websites in our single App. We Build this Web Application in Flutter.
- **Konnect Homes :** Konnect is a SmartHome Product which can control the electronic Appliances through mobile Application and Scheduling is also done from mobile App. In the project complete frontend and backend is done with Flutter using VS Code tool and API's using Python Flask framework and Mysql Database is used.

Infopos PVT LTD

Role: IOT Specialist

Jan 2019 - June 2021

- **Simplifarms:** Simplifarms(Product) is an IOT based Agricultural Application. Devices can control Physical Devices from Mobile Application through ESP Controller. As an IOT Engineer I build multiple products and Programmed to ESP Controller and able to read multiple sensor data from Fields, Monitor the Data and Control the Devices from Controller. The Challenge here is to calculate the accurate sensor data from farm fields to Pumping the water.
